

HTN | HYDRAULIC TENSIONER NUTS - IMPERIAL

Capacities from 198 to 1911 kN

Bolt sizes from 1" to 4" diameter

Maximum working pressure 1500 bar

- ▶ Single acting design with integral load holding lock nut
- ▶ Designed to permanently replace regular nuts on one side of the joint
- ▶ Ideally suited for bolted joints that need opening and closing, during maintenance, on a regular basis
- ▶ High grade alloy steel construction with nitrocarburised corrosion resistant piston
- ▶ Self-energising seals for improved performance at high temperatures and pressures
- ▶ Dual quick connect inlet and outlet couplings for easy multiple tensioner nut connection
- ▶ Visible maximum stroke indicator to warn operator of potential over extension
- ▶ Customised and special design tensioners are available on request

Model number	Bolt size	Capacity		Effective area (cm ²)	Stroke (mm)	Weight (kg)	Tommy bar	Dimensions (mm)

Note: Tommy bars are not included. Hi-Force recommends one tommy bar for every four tensioner nuts.
